VAISHNAVI PATEKAR

Software Developer

Phone : 7058559502 | Email : patekarvaishnavi14@gmail.com | LinkedIn | GitHub | Portfolio

Profile Summary

Self-driven Computer Engineering student with strong foundations in **Java**, **Data Structures & Algorithms (DSA)**, and **Full Stack Development (MERN)**. Skilled in designing scalable, user-centric software solutions with seamless frontend–backend integration. Experienced in building AI-driven and IoT-enabled applications addressing real-world challenges. Passionate about problem solving, system design, and innovation, with ability to learn quickly and deliver impactful projects.

Education

B.E. in Computer Engineering — November 2022 – June 2026
Trinity College of Engineering and Research, Pune | **CGPA: 8.34**

Senior School Certificate Examination (CBSE - Science Stream) — June 2021 – March 2022
Rotary English Medium School and Junior College, Khed | **Score: 79%**

Secondary School Certificate Examination (SSC) — June 2019 – March 2020
St. Xavier's School , Mahad | **Score: 93%**

Skills

- **Technical skills :** Java, OOP, HTML, CSS, JavaScript, React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
- **Databases & Tools :** MongoDB, MySQL, Git, GitHub, VS Code, Postman
- **Soft Skills :** Communication, Teamwork, Problem-solving, Adaptability

Projects

1. Banquet Hall Booking Website — LINK
- Engineered a full-stack **MERN platform** with **real-time slot management** and conflict resolution to prevent double-bookings.
- Streamlined booking flow by integrating RESTful APIs with an intuitive React.js frontend, reducing manual steps for users.

2. Coffee Cafe Website — LINK
- Developed a fully responsive and animated Coffee Cafe landing page using **React**, **Tailwind CSS**, and **AOS**.
- Designed and implemented modern UI components with scroll-based animations, ensuring seamless cross-device compatibility.

3. AI Driven Smart Blind Stick — LINK
- Built an assistive device using **Raspberry Pi** and **ESP32-CAM** for object recognition, voice alerts, and GPS-based SOS.
- Integrated **water , motion detection** with **90%+ obstacle recognition accuracy**, enhancing mobility for visually impaired users.

4. Memory Flipping Tiles Game — LINK
- Built an interactive game using **Core Java** and **Java Swing,** applying **OOP** principles and **data structures like ArrayList.**.
- Implemented event-driven logic for game features such as **timer, move tracking, difficulty levels,** and **responsive UI.**

Internship

Intern – Edunet Foundation(SAP) — January 2025 – April 2025
- Delivered **3+ IoT and AI projects** including sign language recognition and smart brightness control.
- Strengthened AI , ML and Data Science skills through hands-on problem-solving in real-world contexts.
- Collaborated in a team to enhance communication and project execution efficiency.

Certifications

- **Java Course** – Scaler Academy
- **Yuva AI for All** – FutureSkills Prime (NASSCOM & IndiaAI)
- **Augmented & Virtual Reality Bootcamp** – CDAC
- **Accenture Data Analytics and Visualization Job Simulation** – Forage

Achievements

- **Design Patent Granted** – Smart Navigation Stick for Visually Impaired Individuals.
- **Finalist, Code Unnati Innovation Marathon 3.0** – Selected among 160 projects and presented at GTU, Ahmedabad.
- **Winner, ISTE Prototype Making** Competition – Built innovative IoT-based assistive solution.
